# MESSAGE FROM THE AUDITOR GENERAL

The Strategic Business Plan for the three-year period, 2019 – 2022, aims to consolidate the efforts and achievements of the previous period. Great effort has been made to ensure that the Auditor General's Department maintains its relevance by meeting the needs of all our stakeholders.

In keeping with the vision of the AuGD to contribute to "*a better country through effective audit scrutiny*", this Strategic Business Plan (SBP) focuses on improving our audit products to positively impact and influence public financial management and governance practices of the Government of Jamaica. In order to successfully achieve this, there will be a strategic focus on strengthening the internal business processes that support the audit function. Overall, the SBP is anchored to the role of the AuGD in contributing to the efforts of the Government of Jamaica to achieve the goals of the National Development Plan – Vision 2030, and the United Nation's Sustainable Development Goals (SDGs).

Pamela Monroe Ellis

## **EXECUTIVE SUMMARY**

The Auditor General's Department, otherwise referred to as the Department and or AuGD, has sought to continue in its efforts to realise the intended outcome of its five strategic objectives, which were redefined in the last Financial Year.

The five strategic objectives seek to:

- Deploy resources to high-risk operational areas of the public sector through conducting audits based on cross-cutting issues;
- Strengthen and support the Department's internal governance frameworks as well as the Departments ability to execute its mandate in an efficient and effective manner;
- Support capacity building within the Department to allow for a workforce that is able to complete its deliverables in keeping with industry best practice;
- Continue our interaction with key stakeholders as a means of communicating the results of our audits and soliciting feedback on our audit reports.

The indicators included in this plan have been amended in keeping with our intention to increase accountability within our daily operational activities and provide transparency in the publication of our audit reports.

## **1** STRATEGIC CONSIDERATIONS FOR THE PERIOD **2019** - **2022**

The Department will remain committed to its defined strategic considerations presented in its Strategic Business Plan FY 2018 -2021. These considerations have seen some achievements in the Fy2018/2019 necessitating adjustments both to the timeline of activities as well as the means of measurement. The means of determining the Department's performance in achieving its objectives have also been revamped to allow for greater accountability and means of verification for activities completed in support of the stated objectives.

As required of all Government entities, the Departments' strategic objectives are aligned to the National Outcomes as defined in the National Development Plan 2030. The UN SDG Goals are therefore factored into the Departments' strategic considerations as they are aligned with GoJ National Outcomes.

### **1.1 STRATEGIC CONSIDERATION**

### 1.1.1 Compliance Audits

This audit is undertaken to determine whether reliance can be placed on Internal Controls and whether entities are compliant with established legislation, regulations, policies, guidelines and standards. Given the persistent delays by Ministries, Department and Agencies (MDAs), we will commence to carry out compliance audits government-wide on a thematic basis. In the short term it is our intention to subsume the Compliance Audit Unit within the Appropriation Accounts and Financial Statements Units.

### 1.1.2 Audit of Appropriation Accounts and Financial Statements

By the Constitution, the Department is tasked to audit annually, the appropriation accounts of Ministries, Departments and Agencies. However, the fulfilment of this task is hampered by the delays faced by Executives in preparing the appropriation accounts for audit resulting in a serious backlog, as many entities have not submitted accounts for several years. Consequently, Parliament is not provided with recent information on the financial performance of the Executive. Further, because some of our audits relate to accounts of several years ago, therefore, the relevance of these audits are undermined.

In our last SBP FY 2018 -2020 submission we indicated our intention to partner to with the Public Accounts Committee (PAC) and Ministry of Finance to develop a collaborative strategy to address the backlog in auditing financial statements. This has been finalised under an eighteen months' Public Sector Efficiency Programme (PSEP) geared at seeing a total of 163 Financial Statements and 270 Appropriation Accounts, completed by June 2019.

### 1.1.3 Financial Statement Audits (public bodies)

The Department certifies the statements of 30 of the approximately 160 public bodies. A significant part of the audit capacity of the Department is allocated for this effort. For the remaining time of the current PSEP project, we will continue to negotiate with the Ministry of Finance, to have low risk audits outsourced to private audit firms to reduce the burden these mandatory audits places on the Department's limited capacity. This would allow the Department to allocate its resources based on a risk analysis of the entire audit universe.

### 1.1.4 Performance Audits

Our performance audit practice has been significantly strengthened over the last three years. We believe that our reports are well appreciated by the PAC and have resulted in a positive impact on public sector governance in Jamaica.

This FY 2018/2019 we will continue to extend our performance audits to include more cross-cutting issues, a recommendation arising from the SAI PMF review; as well as from recognised emerging risks. We will continue to use the risk-based approach to select our areas of focus, in line with the Government National Development Plan strategies and analyse whether the Government is achieving these outcomes economically, efficiently and effectively.

#### 1.1.5 Special Investigations

The Department continues to be responsive to the needs of our key stakeholders and the general citizenry. For this reason, we have deployed dedicated resources to respond to requests by the Parliament and other stakeholders, as well as to allow for the assessment of, and investigation into the use of public resources.

### 1.1.6 Economic Assessments

Section 48 of the FAA Act mandates the review of the Fiscal Policy Paper and identifies responsibilities in relation to the Fiscal Responsibility Framework, and provide an opinion on risks to the Fiscal Responsibility Framework. The following will be undertaken to fulfil this responsibility:

- Review the Fiscal Policy Paper to ensure consistency with prudent fiscal management
- Comment on the reasonableness of the deviation of outturn from previous fiscal year fiscal targets
- Certify public bodies as part of selected public bodies (commercial activities)
- Identify minimal contingent liabilities in public-private- partnerships (PPPs).

In a context of the Fiscal Responsibility Framework, public entities are required to demonstrate prudent financial management of resources in accordance with the Public Bodies Management and Accountability (PMBA) Act. To inform Parliament and guide the Public Accounts Committee (PAC) in their review of the financial performance of public bodies, the EAU analyses the financial statements of selected public bodies. The Department will also select entities for assessment based on the list provided by the Finance Minister that is proposed for possible commercialisation, as well as those that pose risks to fiscal sustainability.

### **1.2 STRATEGIC OBJECTIVES**

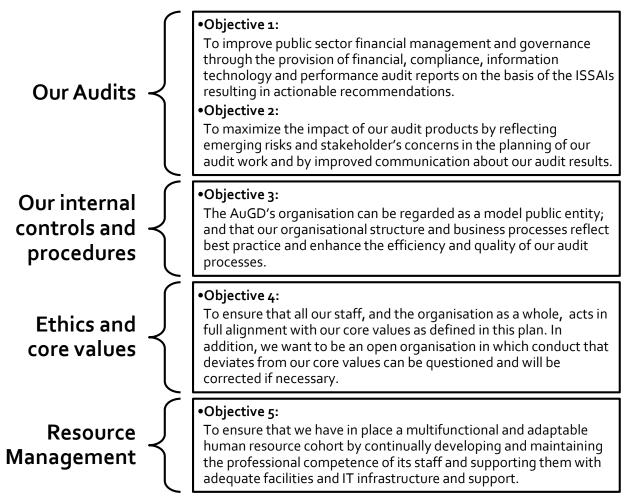

Figure 1: The Departments" Five Strategic Objectives

### 1.3 CONTRIBUTION TO GOJ NATIONAL DEVELOPMENT PLAN, VISION 2030

The Department continues to support the National Development Plan Outcome Number 6, Effective Governance and by extension Jamaica's efforts to meeting the agreed Sustainable Development Goals 2030.

Figure 2: Department's alignment to National Development Goals 2030 and United Nations Sustainable Development Goals

# 2 THE DEPARTMENT

### 2.1 VISION, MISSION AND VALUES

Our Strategic Plan is centred on our vision, mission, mandate and values.

### 2.1.1 Vision and Mission Statement

### 2.1.2 Our Values

We carry out our work based on the following core values, five of which were redefined alongside two new values to support the strategic direction of the Department.

### INDEPENDENCE

•We will audit independently of the Executive and Legislative branches, thereby helping to ensure accountability and transparency of Government activities in an objective and impartial way

### CREDIBILITY

•We work to constantly build and maintain trust with the general citizenry. We sustain credible, reliable and trusted professional teams in each respective field within our areas of responsibility.

### PROFESSIONALISM

•We will undertake our work in accordance with the requirements of international auditing standards.

### INTEGRITY

•We meet our professional responsibilities in an ethical and fair manner.

# COLLABORATION AND INVOLVEMENT

•We seek to collaborate with and involve all stakeholders in the fulfillment of its responsibilities in a constructive manner.

### OBJECTIVITY

•We shall act in an impartial way. Audit conclusions and opinions are based exclusively on evidence.

### TRANSPARENCY

•We operate in the spirit of full openness to the Jamaican society about the way in which it uses its public resources and about the impact of its audits.

Figure 3: The Departments' Core Value

### 2.2 ROLES AND RESPONSIBILITIES: MANDATE

The Constitution of Jamaica mandates the Department to conduct audits of all public sector entities; this includes all Ministries, Departments and Agencies. Section 122 of the Jamaican Constitution gives the Auditor General the task of auditing the accounts of all government bodies, including those entities and projects on which Public Money is spent. This is confirmed by Section 30 of the Financial Administration and Audit (FAA) Act, Section 13.A.1 of the Public Bodies Management and Accountability Act (PBMAA, 2001) and the Parish Council's Act.

There are, however, some entities, which must be included each year in our audit portfolio, as the applicable legislation requires an audit of these entities on an annual basis. Accordingly, the mandate of the Department to undertake financial and compliance audit for the financial year 2019-2018 covers the entities contained in the summarised table below. A distinction is made between our audit universe

(which encompasses all entities that may be subject to audit by the AG) and our statutory audit tasks (which covers all entities where the relevant legislation requires them to be audited by the AG each year).

#### Summary of Audit Universe

Entity Type	Audit Universe	DEPARTMENT Audit Plan
Ministries	15	15
Departments	77	27
Executive Agency	12	12
Fund	2	6
Government Company	36	0
Local Municipality	14	14
National& Public Libraries	14	14
Public/Statutory Body	160	36
Total	330	124

#### Table 1: Audit Universe Summary

In addition to the universe listed above, the Department is required to audit projects that utilise government funds. Eight (8) such projects were added to our audit universe as of September 2017, bringing the total number of entities scheduled for an audit to 132.

Section 122(5) of the Constitution allows the Auditor General to assess the economic use of public resources and provides for the AG to undertake other functions as required to review and assess the expenditure of public funds (e.g. to conduct special investigations). This section also empowers the AG to execute performance audits in addition to financial and compliance audits.

The mandate of the Auditor General was expanded in 2010 to include an assessment of the Government of Jamaica's Fiscal Policy Paper (FPP). The FPP must comprise, as stipulated by the Financial Administration and Audit (FAA) Act, the fiscal responsibility statement, macro-economic framework and fiscal management strategy. Section 48(B) (6) of the FAA (Amendment (No.2)) Act 2010, stipulates that the Auditor General have the responsibility to comment on the fiscal management of the Government through a report, which should be tabled in Parliament. Specifically, the Auditor General is required to give an opinion on the reasonableness of the assumptions and conventions and the justification for deviations from the targets defined in the Fiscal Responsibility Paper (FRP) to be tabled with the budget by the Ministry of Finance.

### 2.3 ORGANIZATIONAL CHART

To support the execution of its mandate, the Department is led by the Auditor General (AG). Two Deputy Auditors Generals' support the AG, to whom the responsibility of Assurance and Performance Audit have been given. The Economic Assessment Unit is headed by a Chief Economists, and this unit is tasked with activities such as the review of the Fiscal Policy Paper (FPP) and Public Private Partnerships (PPP). A third division, managed the Director Corporate Services and is mandated to manage the corporate and support services of the Department. The Internal Audit and Quality Assurance Audit Units, serves to support both the internal governance practices of the Department and give assurance that the Department's audit practices comply with the applicable auditing standards.

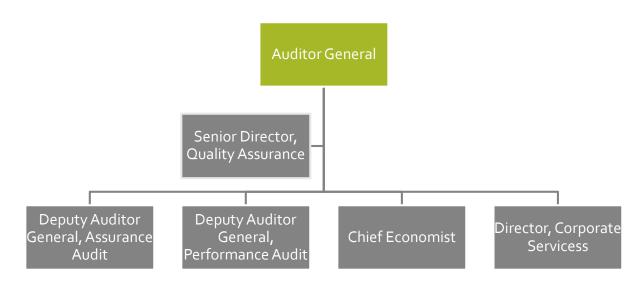

Figure 5: Department Executive Management Organisational Chart

### 2.4 **RESOURCE ALLOCATION**

The Department allocates its staff based on its annual audit plan using a risk-based approach. The annual audit plan is developed as a three-year rolling plan, in the same manner as our Strategic Business Plan, allowing for the matching of resource needs to the Departments intended outputs. As of September 2018, audit personnel were allocated as follows to facilitate a diversified mix of audits:

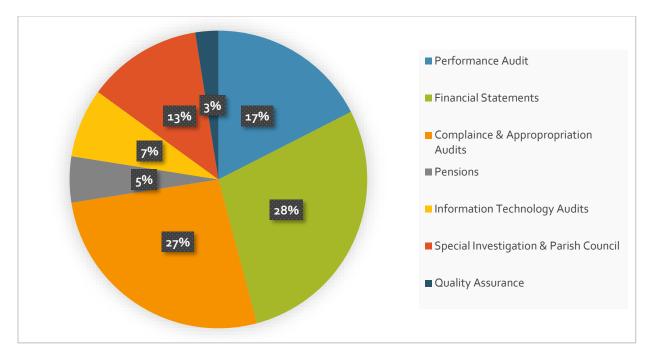

Figure 6: Resource Allocation for Audit streams

### 2.5 HUMAN RESOURCES CAPACITY PLAN

The Auditor General's Department, like all other GoJ entities, are guided in their recruitment based on their established posts. The Department currently has a total of 160 staff members of the 211 stated on the approved establishment.

Units/Divisions/Projects	Approved Complement	Complement as of September 30, 2018	Planned 2018/2019	Planned 2019/2020	Planned 2020/2021
Total Executive Office	9	7	7	7	7
Total Audit Staff Complement	169	125	138	148	158
Total Corporate Services	33	28	29	32	32
Grand Total Staff Complement	211	160	174	183	192

Table 2: Human Resource Capacity Plan

# **3** SITUATIONAL ANALYSIS

In our last reiteration of this plan the Department stated the findings from its SWOT Analysis. The Department's efforts during the FY 2018/2019 sought to address some of the weaknesses and opportunities it had identified in this analysis.

### 3.1.1 SWOT Analysis

Strengths	Weakness	Opportunities	Threats
<ul> <li>Internal organisational structure</li> <li>Relationship with PAC</li> <li>Viewed as impartial and objective</li> <li>Good reputation and credibility</li> <li>Good relationship with stakeholders</li> <li>Communication strategy and policy</li> <li>Active website allowing feedback</li> <li>Quality of audits and user-friendly reports</li> <li>Internal organizational structure</li> <li>Approachable and accessible</li> <li>Incorporating technology into our work</li> <li>Timely submission of reports to Parliament</li> <li>Qualified staff and low staff turnover</li> <li>Training opportunities</li> <li>Quality control and assurance process</li> </ul>	<ul> <li>Inconsistent use of the audit management software</li> <li>Reporting and communicating of completed reports to the general public of Assurance audits</li> <li>Limited engagement with stakeholders</li> <li>AuGD not fully independent</li> <li>Inadequate follow-up of audit recommendations</li> <li>Delays in completing audits</li> <li>Inefficiencies in the audit process and the use of resources</li> <li>Lack of full staff commitment</li> <li>Limited public awareness of AuGD's role</li> <li>Limited use of social media</li> </ul>	<ul> <li>Develop a more cooperative and effective relationship with the GoJ executive</li> <li>Reinforcement of relationship with PAC</li> <li>Focus resources on those areas where an audit can have the most effect</li> <li>Utilize the Regional support of INTOSAI communities</li> <li>Strong legislative framework</li> <li>Existence of CSO dealing with transparency and accountability</li> <li>Strong media presence and influence</li> <li>Strong press freedom</li> <li>Training and financial support through collaborative efforts</li> <li>Demand and interest of AuGD's products from stakeholders</li> <li>Increased use of technology</li> <li>Greater use of social media</li> <li>Improve website features</li> <li>Stable political environment</li> </ul>	<ul> <li>Limitations on the independence of AuGD</li> <li>Imbalance between resources available to the AuGD and demands statutory responsibilities</li> <li>Delay and backlog in preparing and submitting appropriation accounts by MDAs</li> <li>IT infrastructure downtime and cybersecurity</li> <li>Insufficient financial resources</li> <li>Imbalance between available human resources and demands to meet statutory responsibilities</li> <li>Selective and sensationalized media coverage</li> <li>Unwillingness of Auditees to implement audit recommendations</li> <li>Delays in finalizing reports</li> <li>PAC members may lack relevant expertise</li> <li>Delays or non- submission of information from Auditees</li> <li>Inactive PAC leading to delays in deliberating audit reports</li> </ul>

#### 3.1.1.1 STAKEHOLDER ANALYSIS

Figure 7: Key Stakeholder Groupings

We intend to continue our efforts to engage our stakeholders as a means of both addressing weaknesses identified in our SWOT analysis as well as in exploiting opportunities identified. During the last FY we had identified seven distinct stakeholder groups whom we intended to engage at varying levels. The results from the perception analysis will be used to define our baseline as well as inform amendments to our stakeholder engagement strategy and our communication plan for execution in the FY2019/2020 – Fy2020/2021.

Our internal satisfaction survey was also re-administered to ascertain whether or not as a Department we had addressed several weaknesses and or deficiencies identified. The Department succeeded in making marginal gains in some areas. Efforts will continue in the FY2019/2020 to address the weaknesses identified.

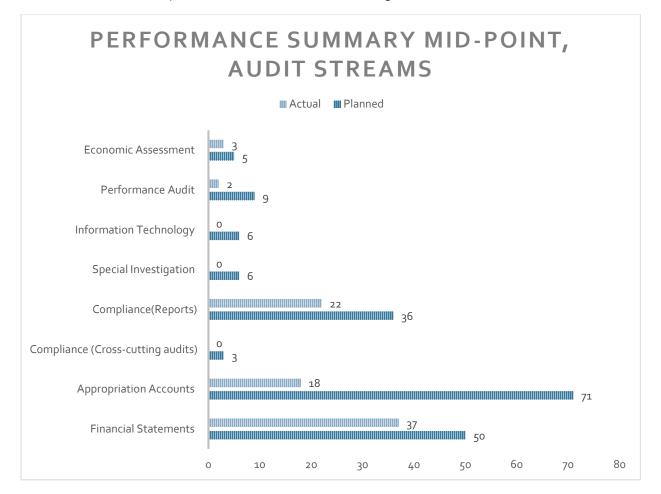

#### 3.1.1.2 Communication Strategy

In recognising, the need to effectively engage its stakeholders, the Department will be implementing the following key activities, in accordance with established framework controls such as the GoJ Communication Policy, the Departments' Communication Policy and ISSAI 12. The full implementation of the Departments communication policy and communication plan (Appendix 7.4) will be implemented during the lifespan of this plan.

### 3.2 CURRENT ORGANISATIONAL PERFORMANCE

### Audit Streams: Assurance, Performance and Economic Assessment

The Department continues to ensure that the audits executed and the reports presented are in keeping with the relevant standards and maintenance of our quality standards. At the midpoint of the FY the achievements for the Department in relation to its stated targets were as follows:

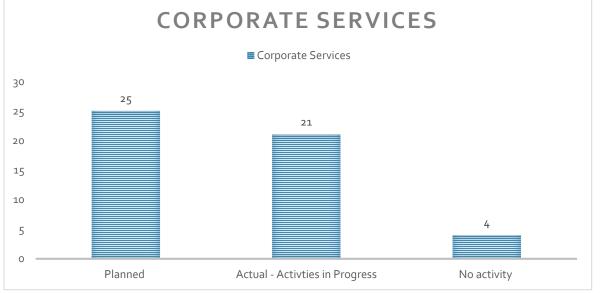

In response to our achievements to-date, several operational amendments have been made alongside the rescheduling of some audits. The Department has also sought to review its "traditional" timelines for the completion of audits as the approach being taken by the Department aims to be inclusive and cross-cutting. Examples of these audits can be seen in the Sustainable Development Goals Audit Report which was recently tabled and published by the Department.

### **Audit Quality**

The Quality Assurance Unit was strengthened in the first quarter FY2018/2019 with the recruitment of a second officer. This has allowed the unit to adjust its annual plan to accommodate at least two audits from each audit stream for a full quality assurance assessment prior to the finalisation of the audit report. The Unit was tasked this financial year with quality checking five percentage (5%) of all audits completed.

## Corporate Services

Within the Division, most activities are annual targets and as such will have to be measured as work-in progress. One significant activity being undertaken is the acquisition and installation of the PBX; this programme was supported by EGov and is scheduled to be completed in December 2019.

# **4** PLANS AND PRIORITY PROGRAMMES

The Departments plans, and priority programmes remain the same as defined for the FY2018/2019. The detailed activities to achieving the objectives as well as the indicators have been amended in keeping with the Departments desire to utilise indicators which present more effective measures for our targets.

### 4.1 OUR AUDIT PRODUCTS

### 4.1.1 Objectives 1 & 2

To improve public sector financial management and governance through the provision of financial, compliance and performance audit reports on the basis of the ISSAIs resulting in actionable recommendations. We also want to maximise the impact of our audit products by reflecting on emerging risks and stakeholders' concerns in the planning of our audit work and by improved communication about our audit results.

### 4.1.2 Summary of key activities to be undertaken

The activities under this objective have been broken down into two groups, those that related to objective 1 and objective 2.

(1) To improve public sector financial management and governance through the provision of financial, compliance and performance audit reports on the basis of the ISSAIs resulting in actionable recommendations.

- Under the Public Sector Efficiency Programme (PSEP) project, the Department, through the Ministry of Finance, will see a total of 163 statutory bodies and 270 appropriation accounts will be outsourced over an 18-month period commencing in January 2019. This project will clear the "backlog" of outstanding audits that the Department has been working with its clients to have them submit the requisite documentation allowing for their audits to be brought up-to-date.
- During the lifespan of the plan, the Department will seek to complete on an annual basis the review of the FPP, and a Financial Statement Analysis of a minimum of two entities annually.

# (2) To maximise the impact of our audit products by reflecting on emerging risks and stakeholders concerns in the planning of our audit work and by improved communication about our audit results.

- All audits will be completed based on government-wide themes and activities in line with our thematic approach and the National Outcomes. Our priorities include the following themes: Governance; Project management; Resource management; Procurement and contracts management; and Information and communications technology.
- Special investigations will be completed based on emerging risks, concerns to the citizenry as well as
  information received from via the "whistle-blowers" act and other credible sources.

### 4.2 OUR INTERNAL CONTROLS AND PROCEDURES

### 4.2.1 Objective 3

Our objective is that the Department can be regarded as a model public entity and; that our organisational structure and business processes reflect best practice and enhance the efficiency and quality of our audit processes. This objective is geared towards increasing the controls within our internal procedures to allow for increased efficiencies in how we carry out our objectives.

### 4.2.2 Activities Summary of key activities to be undertaken

We will seek to review our critical processes and controls to enhance our business processes to reflect best practice and ISO 9001:2015, Quality Management Systems.

- Staff time recording system to support better management of resources and support better planning; the Department will adopt and implement a staff time recording system to generate reliable data on the staff costs for each audit. This will require the adoption of timesheets for all employees as we seek to demonstrate our core values relating to transparency and professionalism.
- At the end of this strategic period it is our intention to have the QA Unit conducting both 'hot' and 'cold' reviews of the Department's audit practice to ensure that the Department's audit reports comply with the ISSAIs that we have adopted as our audit standards.
- In an effort to effectively track statements received from our clients, we will revamp our records management system.

### 4.3 ETHICS AND CORE VALUES

### 4.3.1 Objective 4

To ensure that all our staff, and the organisation as a whole, act in full accord with our core values as defined in this plan. In addition, we want to be an open organisation, in which conduct that deviates from our core values can be questioned and will be corrected.

### 4.3.2 Summary of key activities to be undertaken

- The implementation of a programme of on-going monitoring of compliance and on-going reinforcement to the staff of the responsibilities imposed on them as defined in our core values and our ethics policy. As a new activity, we will develop a sensitization programme on integrity that will fully inform all of our staff to the issues involved.
- The Department will be seeking to utilise the Into-SAINT (Self-Assessment INTegrity) tool to assess our vulnerability and resilience to integrity violations or to develop a specific policy to safeguard integrity.

### 4.4 RESOURCE MANAGEMENT

### 4.4.1 Objective 5

Our objective is to ensure that we have in place a multifunctional and adaptable human resource cohort by continually developing and maintaining the professional competence of our staff and supporting them with adequate facilities and IT infrastructure and support.

### 4.4.2 Summary of key activities to be undertaken

- The training and sensitisation sessions for auditors on new methodologies will be coordinated from this unit, this will include but no limited to the monitoring of Department's audit manuals and audit guidance documents to ensure that they are kept up to date at all times.
- Building on current developments within the wider INTOSAI community where the professionalisation of Audit Office staff is an issue of growing importance, the Department will prepare a strategy aimed at supporting the continued professional development of team members.
- The Department will initiate discussions with the Ministry of Finance and the Public Services Commission about securing greater operational independence for the Department in managing resources and allocating the resources it requires to discharge the full range of its responsibilities as economically, efficiently and effectively as possible.

The Department plans to carry out a detailed, comprehensive review of its IT requirements and manage the implementation of its Information Technology Strategic map.

# 5 FINANCIAL MODEL

The budget submission made is in keeping with the agreed ceiling presented by the Ministry of Finance. The Department is, however, requesting that special consideration be provided to support the activities detailed below:

- The Department requires more resources to improve the efficiency and effectiveness of its audit activities through a dedicated programme of in-house professional education and development. For this reason, the Department is requesting additional funding to support our training plan detailed in Appendix 2, section 7.2.
- Continued investment in the Departments' IT infrastructure is necessary to support better automation of critical processes related not only to its auditing functions but also to its general operating functions. One of these critical components relates to the matter to email management where we are seeking to upgrade and relocate the management of our email platform. The additional expenditure relates as well replacement of laptops and desktops at their end of life.

ТҮРЕ	CATEGORY	SUB- CATEGORY	BUSINESS UNIT	NAME	ES	STIMATED COST - JMD
Equipment	Infrastructure	Security	IT	Fortigate Firewall	\$	500,000.00
Hardware Lease	Enterprise Application	Hosting	Corporate		\$	300,000.00
Software	Enterprise Application	Productivity	Corporate	Office 365	\$	3,500,000.00
Software	Enterprise Application	Hosting	Corporate	E-mail Migration	\$	1,200,000.00
Software	Enterprise Application	Hosting	Corporate	Hosted Exchange	\$	3,500,000.00
Equipment	Infrastructure	Production	Audit	Laptops	\$	9,000,000.00
Equipment	Infrastructure	Production	Corporate	Desktops	\$	4,500,000.00
Equipment	Infrastructure	Networking	Corporate	Access Point	\$	300,000.00
		\$	22,800,000.00			

This investment will also require the provision of annual subscription fees for current software as well as additional software acquisition to support time management. These costs are detailed in the recurrent IT Procurement Plan detailed under section 7.3.

Fourth, the Department will require GoJ to allocate additional resources to Public Bodies and Agencies to finance the audits that it contracts out. The cost of auditing services provided by private accounting firms is significantly higher when compared to the Department's costs. Outsourcing more of the routine financial statement audits, will free resources available to the Department for higher value added audits (for example, in producing reports that deal with high level strategic issues affecting the whole of the government of Jamaica) while at the same time enabling the Department to deal with continuing problems such as auditing the backlog of accounts. Commencing January 2019, the Department will commence the outsourcing of some 433 audits. This activity is, however, being completed under the PSEP project. This project is slated to end in June 2020 and will see all MDA's Financial and Appropriation Accounts being brought to current, FY2018/2019. Once this programme is completed, however, the Department would need to continue the initiative as a means of preventing the MDAs statements falling behind schedule once again.

- The acquisition of a permanent home for the Department during the lifespan of this plan. The current home of the department is a leased facility that currently does not have adequate space for the effective housing of all team members. The high costs associated with parking is another crucial factor in the acquisition of a new and permanent home that allows for adequate parking facilities as well as office space to house the full complement of staff members.
- The acquisition of a vehicle to support the delivery of mail, documents and packages for the Department. Currently, the attendants/bearers are forced to utilise taxi services for the delivery of mail/documents/packages as well as the collection of procurement items where delivery is not possible.
- The Department plans to seek the support of its international partners to carry out (i) an interim review of its response in implementing the recommendations of the 2017 SAI PMF in 2019; and (ii) a second full SAI PMF in 2021.

To support the Department's operational activities for the life of this plan the Department, the budget request is detailed in the table below.

# 6 MEASUREMENT AND EVALUATION OF ORGANISATIONAL PERFORMANCE

### 6.1 **RISK MITIGATION STRATEGIES**

The risks associated with critical activities of the Department have been captioned in table 4. These will be monitored on a monthly basis by the Senior Officer with direct responsibility for the activity, and on a quarterly basis by the Executive Management Committee. In instances where a mitigation strategy has not been effective, amendments will be made by the Executive Management Committee.

### 6.2 MONITORING AND EVALUATION PLANS

The focus of the monitoring and evaluation plan is to collect and report actual performance data on the various KPIs presented in this strategic plan. The table below highlights the critical KPIs geared at addressing current operational weaknesses within the Department.
